The Man Who **Banished Corns**

Blue-jay was invented by a scientist of distinction. By a man whose lifetime has been spent in the study of surgical dressings.

This is a master's method - correct, complete and efficient. And the millions of people who know it, never think of enduring a corn.

All in One

The first step is to stop the pain. This is done by re-moving all pressure - by the soft protecting ring marked A.

The next step is to gently cause the corn to disappear. This is done by the re-markable B & B Wax, which

no corn can resist. This bit of wax - marked B-is centered on the corn. It cannot spread. So, unlike old-time methods, it acts on the corn alone.

C is rubber-coated adhesive. This snugly wraps the

application, protecting everything.

You apply this Blue-jay in a jiffy. The corn pain stops at once. The wrapping is comfortable and you forget it.

In two days you remove it and the corn can be lifted out. Only rare corns need a second application.

This is the scientific way, the easy, sure and right way to end corns. You will never return to any wrong method when you try a Blue-jay once. Try it tonight.

Stops Pain Instantly Ends Corns Completely 25c - At Druggists
